

Donna

Lower jaw intact:

- Upper jaw
- Missing back teeth and wearing a plastic partial denture.
- Front teeth recommended removal by gum specialist due to gum disease.

Dr. Nasedkin and team:

After implant rehabilitation:

- Over time the front teeth are removed, bone augmentation is done and 8 implants are placed – four on each side.
- Reconstruction of the upper jaw takes place with four bridges each of two implant supported crowns and one replacement tooth.
